MERN
GraphQL

👤 PROFILE

Full Stack Developer from the University of California, Berkeley Coding Bootcamp with 1 year of coding experience. I have worked on small team projects that have created Full stack applications from inception to release. I have earned a Certificate from the University of California, Berkeley coding bootcamp Full time cohort. Over the course of the Bootcamp, 3 Full stack applications are created within a small team of 3-4 students and deployed to the web.

🎓 EDUCATION

Bachelor's, Louisiana State University, Baton Rouge – Film Production

August 2019 — May 2021

Certificate, University of California, Berkeley Coding Bootcamp

June 2021 — September 2021

★ PROJECTS

JAM-MAP – HTML5, CCS3, API, Bulma

A music search-based application that allows a user to search for songs primarily through beats per minute. Searches can include country of origin, a year range, genre, and key. Jam-Map utilizes JavaScript along with API calls of other technologies.

<https://github.com/PDPco/jam-map>

<https://pdpco.github.io/jam-map/>

Weather-Dashboard- HTML5, CSS3, Bootstrap, API

Allows users to search a city for the current weather data, temperature, UV index, humidity, and a five-day forecast. This application utilizes the openweathermap API to retrieve the data and offer a seamless user experience that saves previous user searches for future reference.
